Subject: RE: Antelope Creek - specific gravity

Hi Bruce,

Please feel free to contact me with any questions.

In our packet we sent you, Attachment No. 5 has the water analysis data. The injectate water analysis for the nearest injector well is right after the satellite water data, which is typically page 22. On this water analysis report, the calculated density (g/ml) is reported.

Thanks,

Jessie Graham

Subject: Antelope Creek - specific gravity

Hello Jessica, thank you for the application package for both the expansion of and the add wells to the area permit.

We may have additional questions as we move forward. The one I have now is in regards to the specific gravity of the injectate.

Does Petroglyph have a calculated average for this area? Thank you.
